FFS Agency Standard Pricing: Family Forward Surrogacy's traditional "Agency Standard Pricing" allows IPs to take advantage of a low flat fee for agency services. In this Agency Standard Pricing model, the fee is paid per match with a single surrogate. If the first Surrogate does not deliver a baby for the Intended Parents, the IPs would have to pay a new fee to be matched with a second surrogate, effectively doubling the price of the Agency Fee.

FFS Agency Fee Guarantee Program (FGP) Pricing: With the FFS "Agency Fee Guarantee Program (FGP) Pricing", Intended Parents pay a higher fixed-fee for the peace of mind that if a second surrogate is needed, to have one baby, no additional agency fee will be charged.
